OVERVIEW

Enthusiastic and results-oriented Software Engineer with a passion for crafting user-centric interfaces. Proven ability to collaborate effectively across teams, optimize website performance, and build dynamic web applications using React.js. Possesses strong technical skills in web development and UI/UX design.

EXPERIENCE

Jan,2024 – Current

Software Engineer | Harmosoft

- Collaborated with designers and back-end developers to build a dynamic and interactive website using HTML, CSS, and JavaScript frameworks.
- Optimized website performance by implementing best practices for code structure and image compression, resulting in a 30% reduction in loading times.
- Conceptualized and designed the UI/UX for a new e-commerce feature, ensuring a smooth and intuitive user journey.
- Integrated third-party APIs to enhance the functionality of the web application, improving user engagement and data collection.
- Initiated the development of a new mobile app, utilizing React Native to create a user-friendly and responsive interface.

May,2023 – Dec,2023

Fiber Technician| Zoommeek Technology

- Performed on-site network assessments to identify optimal Wi-Fi and fiber optic cable installation locations. Troubleshooted connectivity issues and ensured proper functionality of internet services for residential and commercial clients.
- Configured and maintained network equipment, demonstrating strong understanding of network infrastructure
- Installed and configured routers and access points, ensuring optimal signal strength and coverage.
- Developed and implemented efficient cabling layouts to maximize network performance and user experience.
